DETAILED ACTION

Election/Restrictions

1. Amendment filed 5/23/05 necessitated Election/Restriction requirement
2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I : Directed to a tool for removing a friction-fit or press-fit component from a seat comprising a coupling redirecting the percussive force at the forward end of the hammer to a component located rearwardly of the hammer and drawn to claims 1-18 and 41 (Figs.4-7).

Species II : Directed to a tool for removing a friction-fit or press-fit component from a seat comprising a cap and anvil attached to the hammer and drawn to claims 38 and 40 (Fig.9).

Species III : Directed to a tool/kit for comprising a pull rod interconnected with component located rearwardly of the air hammer (a mounting portion at rear portion /coupling is attached to a rearward end) and drawn to claims 23-37 and 39 (Figs.10-11).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3726

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
